

Opportunity to Join Permeable Pavement Study

The Wisconsin Standards Oversight Council (SOC) is looking for permeable pavement system representatives interested in participating in a monitoring study starting in 2019. This study is designed to provide information to develop and refine criteria for WDNR Conservation Practice Standard “Permeable Pavement” (1008).

Location

- Sycamore Park, Madison WI
- For more information regarding the monitoring site, see <https://www.usgs.gov/science/evaluating-potential-benefits-permeable-pavement-quantity-and-quality-stormwater-runoff>

Study Features

- Flow and water quality monitoring at inlet, underdrain and overflow locations
- Monthly surface infiltration testing
- Water quality analyses for TSS, TP, DP, E. Coli, Enterococci, Chloride, pH and others if requested
- 2-years of data collection, 1-year of analysis and report development
- Study results published in a peer-reviewed USGS series publication or article in a professional journal

Estimated Participant Total Cost

- \$90,000 per test cell
